

New Microbiological Testing & NATA Laboratory - WA

A recent expansion of testing in Western Australia, now includes a NATA accredited Microbiology laboratory at our Bibra Lake site.

Agrifood Technology's newly built facility, offers state of the art technology to deliver customers accurate and on time microbiological results. Our Western Australian and Victorian laboratories offer customers a comprehensive testing service from raw ingredients, finished products to environmental monitoring and waters.

Agrifood Technology's scope for Microbiological Testing incorporates all common bacteria and pathogens. Our methods (AOAC, AS, ISO and AFNOR) are applied to and verified against the majority of food matrices and various water types. We are also accredited for environmental monitoring as well.

Matrices tested:

Cereal products	Vegetables & vegetable products
Nuts & nut products	Fruit & fruit products
Dairy products	Animal feeds
Meat, meat products - including poultry	Mixed foods
Eggs & egg products	Herbs & spices
Fish, crustaceans & molluscs	Pet foods
Sugar products, honey & confectionery	Poultry & poultry products

By offering this comprehensive range, we can help you identify which common organisms and foodborne pathogens may be present thus ensuring that your products meet the required quality standards.

In addition, for customers based in the metropolitan area, a free pick up service is offered. Providing you the convenience and peace of mind, as samples are transported directly into the laboratory. Additionally, we can offer customers new method development, shelf life and challenge studies to meet your product requirements.

Please feel free to contact us to learn more about our service.
